

Willamette Express LTD. Logistics moving and transportation

Willamette Express LTD. will remain open and fully operational as we are an essential business exempt from the state mandated stay-at-home orders for Oregon, Washington and California.

Willamette Express LTD is a material handling distributor deemed essential in the supply chain of public utilities, ports and logistics, food production and distribution, construction, telecommunications, and waste recycling. We provide services to these vital industries which include warehousing, distribution, transportation, in both the private and government sectors.

As an essential link in the supply chain to these critical sectors, Willamette Express Moving Storage and distribution services, will remain open during our standard operating hours of 8:00 AM to 4:00 PM. We ask for your patience as our ability to assist may be slower. Some on our team is working remotely to mitigate the spread of the coronavirus.

We have made it clear that if any employee who does not feel safe will not be required to work and will get compensation for as long as can be considered without interrupting our ability to operate. Those in the trenches, who have volunteered to continue to work, will continue to follow the guidelines prescribed by the various health organizations. In this constantly changing situation, we will take actions that are warranted as new information emerges. The health and safety of our employees, business partners, and the extended members of the various communities in which we operate will continue to be our utmost priority.

We thank you for your support during these challenging times. We truly hope that you, your families and your communities remain healthy and safe.

Jon Calvin President.
